

ABSTRACT OF THE DISCLOSURE

A computer armrest includes an elbow supporter, a mouse pad and a connect arm. The elbow supporter and the mouse pad are movably connected with the connect arm so as to freely turn with the position of the elbow or the palm. The elbow supporter
5 can be adjusted more than 90 degrees by means of the connect arm and also bent downward to be collapsed under a computer table not to lake any space on the table in case of not using.
